Lockheed Martin Cyber Security Classes at Montgomery College

For the first time, Montgomery College and industry giant Lockheed Martin join together to meet the nation’s growing demand for cyber security professionals. Register now to benefit from this exciting partnership where you will learn from the industry’s leading experts in secure software development.

Digital Forensics
Course #: ITI207
This course will provide an overview of forensics tools and methods in the commercial security market, also a comparison between corporate and law enforcement forensics. This course will give the participants an understanding of the advantage to forensic testing during the development process and in preparing incident response plans. Configured computers will be available for each attendee/seat. Cost: $1,495.00 ($598 tuition and $897 fee).

Gaithersburg Business Training Center
12 S. Summit Ave. Room 406 • Gaithersburg, MD 20877
CRN #: 36955  4/8–4/11  Tuesday–Friday  9 a.m.–5 p.m.

Secure Coding and Software Engineering
Course #: ITI208
Learn the security principles and engineering tasks that must be considered during each of the software development lifecycle phases irrespective of the specific lifecycle being used. Concepts include system threat modeling, critical asset identification, secure design principles, and common software design patterns and frameworks that can be leveraged to develop more secure systems. This course will also teach developers the concepts and skills needed to develop secure software and will address code level remediation concepts for the most common security vulnerabilities. The course will cover the major security vulnerabilities in a very granular and hands-on fashion with classroom computers. Portable computers will be provided for those attendees who do not bring one to class. Cost: $1,495.00 ($598 tuition and $897 fee).

Montgomery College Germantown Campus • 105 Paul Peck Building
CRN #: 36956  2/25–2/28  Tuesday–Friday  9 a.m.–5 p.m.
