A Day of Drones *One day program*

The Drones are here! Let the battles begin. In this hands-on, interactive event you will learn how to safely fly drone robots. Working in teams, you will be able to code your drone to compete in missions that will prepare you for the ultimate team challenge at the end of the day. Students will work in pairs or teams for most of the program. Black Rocket Productions. There will be a break for lunch. Bring a lunch from home!

Creative Writing Workshop

Welcome to the boundless world of creative writing, where you control the story! In a relaxed environment, learn the writing skills that transform ideas into short fiction, novels, and poetry. Enter a community of writers where students of all skill levels are encouraged to grow and craft stories together, with lessons in character creation, word building, and free writing. Sharpen English skills with lessons in grammatical rules, and experiment with the creative mediums that allow those rules to be broken. Let's create together! Yang Academy

Engineering Basics and Motorized Machines

This exciting hands-on engineering class uses Lego Education building materials. In teams, you will learn the basics of engineering and simple machines. You will be introduced to the concepts of pulleys, levers, gears and more. From this foundation you will move on to compound machines and motorized vehicles and robotic creations. You also get a chance to put your new knowledge to work creating your own mechanized designs. Your team will creatively solve challenges using concepts learned in class. Last, but not least, you will get the chance to become inventors. Goldsmith Education

DRONE ADVENTURES

Made by You—A Day of Creativity *One day program*

Spend the day creating one-of-a-kind pieces at various art stations! You'll have a variety of developmentally appropriate activities at your fingertips such as painting, using yarn, making jewelry, designing a collage, making a duct tape project, doing decoupage, making greeting cards, decorating journals, sewing by hand, drawing, making dream catchers, weaving, and more. You can make as many items as you like and take them all home with you. This is a wonderful opportunity to stretch your imagination and create personal gifts for the holiday season. An emphasis on using everyday objects to create masterpieces will allow you to take your ideas and expand them at home. Instructors: Youth Programs Staff. There will be a break for lunch. Bring lunch from home.

Puppet Show Producers

Are you interested in making your own puppet shows from start to finish? Join us to learn about the puppet show creation process with storyboarding, script writing and puppet making. This course will focus on two major projects: making a hand puppet & making a "crankie" (a box theater with a rolled-up paper scroll of illustrations that the puppeteer moves to tell a story). By the end of the course, puppeteers will have improved their writing, visual art and performance skills to create and perform puppetry performances both solo and in collaboration with friends! Virtual Reality: Enter the Metaverse

Take control of your environment and learn the skills needed to become a Virtual Reality game developer! In this advanced course, you will be challenged to complete more complex programming challenges that explore foundational concepts in computer science, game development, and 3D art design. After working through our guided project environments, you'll have all of the skills needed to create a full VR game on your own. At the end of the week, take home a cardboard VR headset to allow friends and family to experience the new worlds you created. VR projects can be viewed on a website or mobile device, and will be available on a password-protected Black Rocket website. Students do not need a mobile device to take the class, but will need access to a mobile device at home to view any projects in Virtual Reality. Black Rocket Productions
